

Market Goat

4-H Project Newsletter

This Market Goat Project Newsletter contains information specific to the Market Goat Project. Please use it in conjunction with the General 4-H Information Bulletin, so that you are aware of Achievement Day completion requirements as well as general opportunities and information pertaining to all 4-H members. This Project Newsletter, as well as the General 4-H Information Bulletin, will be updated in December of each year, if necessary, based on changes made at the 4-H Nova Scotia Annual General Meeting.

Welcome to the 4-H Market Goat Project! This newsletter will give you an overview of the Market Goat Project, answer some of your questions concerning expectations of the project and provide you with project ideas and some resources. Project newsletters are an excellent reference to keep on hand to refer to throughout the year. Enjoy your year in the Market Goat project and when working on your project, remember to "Learn to do by Doing." If you have any questions, please contact your [Regional Program Coordinator \(RPC\)](#).

The Market Goat Project was developed to educate the 4-H member about raising, fitting, showing and the sale of their animal, and to promote 4-H through a 4-H Goat Sale at the 4-H Nova Scotia Provincial Show.

The Market Goat Project is where you, the member, present a high-quality finished product for sale. It is your responsibility to search for buyers, to promote your product and to explain to potential buyers why it would be beneficial to purchase your animal! Do not limit your search to local grocers or abattoirs, but approach local businesses and individuals, as well. The major difference in sale price from one animal to another is the promotion and personal contact that the 4-H member made prior to the sale. 4-H members who put forth the effort often reap the benefits of dollars in the end!

At a later date, you will be provided with an invitation flyer to give to prospective buyers to encourage them to attend. If you need additional flyers or if you decide NOT to take your goat to the 4-H Nova Scotia Provincial Show, or if there has been a change to the registered tag number you must report it to the 4-H Nova Scotia office at 902-843-3990 or email: market@4hnovascotia.ca.

Who Can Register?

Any member who has successfully completed two (2) years or more in the Goat Project may register in the Market Goat Project.

Members in the Market Goat Project must also complete the 4-H Goat Project for the current 4-H year to compete at the 4-H Nova Scotia Provincial Show.

Members must show their own registered 4-H animals at Achievement Day to qualify for county exhibitions and 4-H Nova Scotia Provincial Show in the current 4-H year.

How Do I Apply?

Members need to register in the Market Goat Project with their club by the project add/drop date (April 15th) and complete the attached application and send it to 4-H Nova Scotia by June 30th of the current year to the address as noted on the application form. Remember, the 4-H Nova Scotia Committee is very strict on this deadline, and it is your responsibility to follow up to make sure your application has been received by the deadline.

Achievement Day Requirements

The project work requirement for the Market Goat Project is a showmanship class. The Market Goat Project is a separate project from the Goat Project. 4-H members must show their own market goat at Achievement Day to complete the project. You then have the option of going on to the 4-H Nova Scotia Provincial Show 'N' Sale, if your animal is of show and sale quality (and you have filled all the requirements for project completion). Please remember that market animals may not be used in regular showmanship classes.

The dress code for Market Goat is a white shirt and white pants. Hard-soled boots are encouraged. Members can wear sun-safety hats when showing livestock in an outdoor area.

Your record sheet should be started when the goat was born or purchased in the spring.

Please note, members in the Market Goat Project judge the same four animals as the Goat Project.

Conformation

Although conformation is not an Achievement Day requirement, Market Steer / Lamb / Turkey / Goat classes at 4-H Nova Scotia Provincial Show will be judged on conformation.

Specific Market Goat Rules

- There will be five (5) goats selected for the sale at the 4-H Nova Scotia Provincial Show.
- All goats participating must be properly castrated with no cords or testicles evident or be female.
- If applicable, all goats must have a Canadian National Goat Federation ID tag.
- Goats must weigh between 50-100 lbs. at the time of the sale. Goats not falling within this weight range may be selected at the discretion of the committee.
- Goats exceeding 100 lbs. which are deemed acceptable for the show/sale will be sold and paid at a weight of 100 lbs.
- Goats must be clean and well-presented but do not have to be clipped. All goats must be dehorned
- Members must have completed two (2) years in the Goat Project to be eligible for this project and must be currently enrolled in the Goat Project to do market goat.
- A member can register in both the Market Goat Project and the Goat Project. A member can show a chevon in the Goat Project Chevon Section, as well as a Market Goat in the Market Goat Project, if eligible. Registering and exhibiting in both the Chevon Goat Class and the Market Goat Class would require two (2) separate animals.
- The Market Committee is determined to keep the show and sale costs to a minimum. An 8 % sales fee will be deducted from the price received by the consignor to cover costs of the show and sale.

4-H Nova Scotia Market Committee

This Committee will be named by 4-H Nova Scotia. The members of the Committee are responsible for the Market Steer, Lamb, Turkey and Goat Show 'N' Sale at the 4-H Nova Scotia Provincial Show. They will deal with obtaining judges, auctioneers, publicity, ribbons, buyers and enforcing the regulations. The Committee will also determine the number of animals participating at the 4-H Nova Scotia Provincial Show each year.

Updated guidelines may be issued by the 4-H Nova Scotia Market Committee, as approved by 4-H Nova Scotia. These guidelines will be mailed directly to the registered Market Steer, Lamb, Turkey and Goat members.

4-H Nova Scotia Provincial Show

- Members are responsible for arranging delivery of the goat from the sale to the designated packing plant or to the location as requested by the buyer. Expenses, such as trucking, could result.
- Members are responsible for the care of their goat until 12:00 noon Sunday, of the 4-H Nova Scotia Provincial Show (this means feeding and cleaning the animal) unless the animals are removed following the sale. Buyers may remove the animal earlier than 12:00 noon on Sunday.
- In market projects, members must show their own animal in the conformation class and in the auction at 4-H Nova Scotia Provincial Show.
- Following the Show and Sale, a photographer will be on hand to photograph members with the animal and the buyer. You and your buyer will receive a copy of the photo at a later date. Your project meetings may be included in the regular livestock project meetings. Several of these ideas may add some variety to your meetings, especially if many project members are experienced.

Market Project Meeting Ideas:

- Judge a class of carcass or meat cuts. An excellent resource is your local abattoir owner, grader and grocery meat manager.
- Tour a local abattoir, grocery meat department or rendering plant.
- Listen to a presentation from a local representative of the Nova Scotia Beef Producers, Sheep Producer, Goat Producer or Poultry Producer about their marketing of product, problems and concerns.

Please note that the National Farm Animal Code of Practice should be followed when housing animals for 4-H events.

These standards can be found at: <http://www.nfacc.ca/>

Contagious/Infectious Disease & Quarantine

4-H members, leaders, parents and livestock owners are reminded that 4-H Achievement Days and shows are showcases for the 4-H program, and the agricultural industry in this province. They are reminded that infectious diseases can be transmitted during transport, as well as at the show. As such, it is strongly recommended for the protection of the public, participants, and the animals at the show, that animals having or showing signs of infectious diseases not be brought to shows. As well, livestock exhibitors and

owners must understand that in attending 4-H Shows, there is a risk of their animal contracting disease regardless of the best efforts of all involved.

If you suspect that your animal has a contagious/infectious disease, please contact your local veterinarian immediately and learn more about the consequences, treatment, and transmission of the disease.

Brochures, "Skin Infections of Particular Concern to 4-H Calves: Ringworm, Warts and Lice" and "Fact Sheet: Animal Health and Safety Best Practices" are available. If you wish to receive a copy by mail or email, please contact your Regional Program Coordinator. It contains important information for all livestock members on this topic and will be critical to review with 4-H Clubs, livestock owners, and your local veterinarian when making decisions about attending 4-H achievement days and shows.

Animal Movement Reporting

Regulations around moving animals to and from Fairs, Exhibitions, Achievement Days, 4-H Nova Scotia Provincial Show and other events are in place or are coming into place for some species. The Canadian Food Inspection Agency is responsible for these regulations regarding the identification of animals and how livestock owners report moving animals on and off the farm. This includes individual animal ID tags and reporting the movements of animals. Tag numbers are to be reported by the owner/operator of a premise when the animals enter, and then by the farmer/owner when the animals are brought back to the farm or where they are housed for the species affected.

Movement Document – A Movement Document is to travel with the animals. This document will record the departure premise and destination premise, as well as the quantity of livestock being transported. These documents will be made available by CFIA once the regulation changes come into effect.

There are three things 4-H members can do to prepare for these changes.

1. Identify your livestock premises by applying for or confirming a premises identification (PID) number with the Nova Scotia Department of Agriculture www.novascotia.ca/agri/pid.
2. Confirm or set up a Canadian Livestock Tracking System (CLTS) database account at <https://www.canadaid.ca/> with Canadian Cattle Identification Agency (CCIA) by toll-free telephone at 1-877-909-2333 or email: info@canadaid.ca CLTS MOBO - a free app to submit animal movement events quickly and easily to your CLTS database account using a mobile device
3. Voluntarily report receipt (move in) event data to your CLTS database account for livestock arriving at your livestock premises using the individual animal identification, within seven days of receipt.

For more information please contact the Nova Scotia Department of Agriculture Premises Identification Office at 902-956-2707 or NSPID@novascotia.ca.

Livestock Insurance

4-H Insurance does not cover project animals. Insurance coverage for animal liability, injury or death is the animal owner's responsibility.
